**SEAMS School on Coding and Graphs**  
**28 September – 06 October 2015, Makassar - Indonesia**

**I. Summary**

The South East Asian Mathematical Society Schools 2015 (SEAMS School 2015) are part of series of intensive study programs that aim to provide opportunity for advanced learning experience in mathematics, and to introduce research-based learning for advanced undergraduate as well as masterly students of the country in which it is held, and for countries nearby. A SEAMS School can also be considered preparation for students who wish to apply for the CIMPA Research Schools.

SEAMS School on Coding and Graphs was the first of the Seams school conducted by Hasanuddin University. SEAMS School on Coding and Graphs is to introduce the students to the fundamental theories of coding and graph and improve the ability of undergraduate students in coding and graph. The relation between these two fields will be also discussed in this school. This school focus on the following four courses, namely (1) Coding Theory, (2) Graph Labeling, and (3) Ramsey Number. Beside of lecture courses, there are problem solving session in the afternoon. In these sessions, the participants were divided into groups of 5 people to discuss and solve some selected problems from the problem sheet given by the lecturer.

SEAMS School on Coding and Graphs started from 28 September until 6 Oktober 2015. SEAMS School on Coding and Graphs jointly organized by Mathematics Department Faculty of Mathematics and Natural Sciences Hasanuddin University and Indonesian Combinatorial Society (InaCombS). SEAMS School on Coding and Graphs held at Seminar Room in Mathematics Department.

SEAMS School on Coding and Graphs is sponsored by Center International for Mathematics Pure and Applied and Hasanuddin University.

**II. Scientific Objectives and Rationale for the School**

In general, SEAMS school has objective to facilitate contacts with a large number of mathematicians working in these areas and the students coming to the school. A SEAMS School also encourages participants to pursue further studies in mathematics and do mathematical research.

In particular, this SEAMS School introduce students to the fundamental theories in number, coding, graph labeling, and Ramsey number. Besides that, the SEAMS School to provide young researchers with sufficient knowledge and background to start their research in coding and graphs.

### III. Organizers and Lecturers

The organizing committee of SEAMS School on Coding and Graphs consisted of

- Dr. Nurdin, S.Si., M.Si. (Hasanuddin University)
- Dr. Kiki Ariyanti Sugeng (President of InaComBS, Indonesia University)

with assistance from the Mathematics Department composed of Prof. Dr. Hasmawati. M.Si., Dr. Nurtiti Sunusi, S.Si., M.Si., Drs. Khaeruddin, M.Sc., Jusmawati Massalesse, S.Si., M.Si., Anisa, S.Si., M.Si., Edy Saputra, S.Si., and Mulkih.

The lectures were given (in alphabetical order) by the following:

1. Prof. Dr. S. Arumugam  
Professor, Kalasalingam University - India
2. Dr. Djoko Suprijanto  
Lecturer, Institut Teknologi Bandung - Indonesia
3. Prof. Dr. Edy Tri Baskoro  
Professor, Institut Teknologi Bandung - Indonesia
4. Prof. Dr. Hasmawati, M.Si.  
Professor, Universitas Hasanuddin - Indonesia
5. Dr. Kiki Ariyanti Sugeng  
Associate Professor, Universitas Indonesia - Indonesia
6. Dr. Loeky Haryanto, MS., M.Sc., M.A.T.  
Associate Professor, Universitas Hasanuddin - Indonesia
7. Dr. Nurdin, S.Si., M.Si.  
Associate Professor, Universitas Hasanuddin - Indonesia

In the original plan, Professor Mirka Miller from Newcastle University, Professor Joe Ryan from Newcastle University, and Professor Christian Mauduit from Institut de Mathématiques de Luminy agreed to give lectures in this school. However due to some important reasons, they could not manage to come and deliver his lectures in this school. To overcome this situation, Professor Arumugam fulfill Miller and Ryan's lecture slots and more problem-solving sessions were also added. Besides that, Dr. Loeky Haryanto gave more lectures to fulfill Mauduit's lecture slots.

#### IV. The Participants

The school was announced at the website <http://unhas.ac.id/math/semas>. The deadline for application was September 01, 2015. There were 58 applicants. Among them there were 9 applicants from students outside Indonesia, 8 applicants from students outside Makassar, and the others applicants from Hasanuddin University students. Hasanuddin University students are undergraduate and master programs. After the examination of applications, 50 students were selected. There are 9 students from outside Indonesia (amount them 7 from Philippines and 2 from Nepal) and 41 Indonesian students (amount them 5 from outside Makassar, i.e. 1 form Ambon, 1 from Bali, 1 from Bogor, 2 from Palu, and 3 from Bandung).

Two participants from Nepal cancelled their participations just a week before the school started, because as government official, they did not get permission from their government to leave the country. Besides that, there are 3 participants from Philippines, 1 from Bandung, and 2 from Palu did not came at the school.

Finally, there were 4 participants from abroad, they are from Philippines and the others from Indonesia. The Indonesian participants also came from various regions: 1 from Bali, 1 from Bogor, 1 from Ambon, and 2 from Bandung.

## V. School Programs

### Mini-Courses:

1. Block Linear Codes (BLC), **Loeky Haryanto**
2. Introduction to Cycle Codes (ICC), **Djoko Suprijanto**
3. Ramsey Number in Graphs (RNG), **Hasmawati**
4. Irregular Labeling (IRL), **Nurdin**
5. Magic and Antimagic Labelings (MAL), **Arumugam**
6. Harmonious Labeling (HL), **Kiki A. Sugeng**
7. Size Ramsey Number (SRN), **Edy Tri Baskoro**

**TIME TABLE OF SEAMS SCHOOL CODING AND GRAPHS, 28 SEPTEMBER - 6 OCTOBER 2015**

**WEEK I**

14.30 - 14.45		<b>Break</b>		
14.45 - 16.15		Problem Solving	Closing	

On Friday and Saturday, 2 – 3 October 2015 all of the SEAMS School participants attended in International Conference on Mathematics, Statistics, Computer Sciences, and Mathematic Educations which held by Mathematics Department Faculty of Mathematics and Natural Sciences Hasanuddin University. This conference held in campus with the chair of this conference is Dr. Nurdin, S.Si., M.Si.

## **VI. Conclusion**

It is a great pleasure to report that the SEAMS school on Coding and Graphs held in Makassar – Indonesia went very well with a great success. Students had opportunity to learn an introduction to a very advanced subject in Coding and Graphs as well as learn about some modern trends in this area. Students also had opportunity to meet some distinguish professors who taught at the school.

Students in the region also had opportunity to meet each other that could lead to a collaboration between them in the future. On this occasion, the organizers would like to thank SEAMS and CIMPA for supporting the idea to organize this international school for students, and especial thank to CIMPA for generous financial support, without it we cannot invite foreign students to come.

According to the students, the courses in this school were informative and useful since the courses provided a lot of knowledge and gave the participants a chance to have interesting discussion among them. The participants found the lectures were inspiring, updating and going into detail.

After the school, some students make Facebook Group, namely SEAMS SCHOOL MAKASSAR 2015, to discuss anything. The members of this group are all of students from Philippines, some students from Indonesia, and some organizing committee.
